Dated the 12<sup>th</sup> September, 2016

To

The Addl Chief Secretary/Principal Secretary  
Rural Development & Panchayati Raj Deptt  
All States/UTs

Subject: **Mission Water Conservation - Draft Natural Resource Management Framework under MGNREGS within the overall framework of PMKSY**

*Dear Additional Chief Secretary / Principal Secretary*

Enclosed please find draft for discussion titled Mission Water Conservation - Draft Natural Resource Management Framework under Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) within the overall framework of Pradhan Mantri Krishi Sinchayee Yojana (PMKSY). The need for drought proofing villages in water stressed regions has been felt for many years. Many State Governments started excellent initiatives for water conservation in 2015-16 and 2016-17 using MGNREGS resources. In 2015-16 nearly 45 lakh hectares of additional irrigation potential was created under MGNREGS. A similar or higher potential is likely to be created with the concerted thrust on water conservation in 2016-17. Considering the importance of water conservation, using all the scientific and technological advances at our command, the Department of Rural Development wants to ensure that MGNREGS funds are used in accordance with the best practices in the sector. The draft framework is an effort to ensure tangible drought proofing outcomes in selected Gram Panchayats over the next few years.

2. This is to request you for suggestions for improving the framework over the next 7 days so that we are able to finalise the framework well in time before the Gram Sabha meetings of 2<sup>nd</sup> October to prioritise the shelf of projects under MGNREGS. We look forward for an early response.

*Best wishes,*

encl: as above

  
[Amarjeet Sinha]  
Secretary (RD) 12/9/16

DRAFT FOR CONSULTATION

# Mission Water Conservation

A Draft Natural Resource Management  
Framework under MGNREGS  
Within  
Overall PMKSY Framework for Action

**Ministry Of Rural Development  
Government of India**

**Planning and monitoring framework for Natural Resource Management related works under Mahatma Gandhi NREGA (MGNREGA), Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) and Integrated Watershed Management Programme (IWMP).**

**Background**

About 65 million hectares (45%) out of the 141 million hectares net sown area in the country, is currently under irrigation, i.e. 76 million hectares are rainfed and correspond to some of the most backward regions of the country. There are 112 most "irrigation deprived" districts. (State wise list enclosed as Annexure-1). Further, over utilisation of groundwater has led to grim situation in 1068 Blocks and 217 Blocks that have been categorized as Over Exploited Blocks and Critical blocks respectively (list enclosed as Annexure-2).

Creation of sustainable livelihoods through Natural Resource Management, that enhance productivity of land, restore ecological balance and provide diverse livelihood options to the rural households is the key to eradication of poverty and hunger. Successful efforts have been made in States for water conservation in recent years. The 'Mukhyamantri Jal Swalamban Abhiyan' in Rajasthan, the 'Dobha' or Farm Ponds construction in Jharkhand, the 'Mission Kakatiya' in Telangana. 'Neeru Chettu' in Andhra Pradesh, 'Kapil Dhara' in Madhya Pradesh, bore well recharge in Karnataka, 'Jalyukt Shivar' in Maharashtra are some of the recent initiatives. The present Framework draws on many of the good practices in these States and some other initiatives.

The three flagship programmes, referred to above viz. Mahatma Gandhi NREGA, PMKSY and IWMP have such common objectives. Types of common works undertaken under these programmes/ schemes are water conservation and management, water harvesting, soil and moisture conservation, groundwater recharge, flood protection, land development, Command Area Development & Water Management (CAD&WM). These programmes address the above mentioned issues with their own set of planning tools, processes, technical expertise and financial resources.

As per Schedule -I of Mahatma Gandhi NREGA, there are 153 kinds of works identified as permissible works, of which 100 kinds of works relate to NRM alone (list enclosed as Annexure-3). Out of the 100 NRM works, 71 are water related. Around Rs.24300.00 crore was spent on NRM works in FY 2015-16 which is 58.41% of the overall expenditure. In FY 16-17 (so far) expenditure on NRM related works has crossed 63%. The technical man power under Mahatma Gandhi NREGA is not adequately trained to carry out these works and as such the works executed are often unsatisfactory in quality and do not conform to the desired technical specifications.

On the other hand, while IWMP has trained technical manpower to carry out NRM on watershed principle and has Detailed Project Reports (DPRs) prepared for most of the watersheds, it is short in terms of financial resources and deep reach like the Mahatma Gandhi NREGA.

PMKSY focus is on ensuring convergence with all rural asset/infrastructure based programmes/schemes related to water conservation and management like Mahatma Gandhi NREGS, IWMP, Rural Infrastructure Development Fund (RIDF), Rashtriya Krishi Vikas Yojana (RKVY) etc. Under PMKSY around Rs.175 crore have been released (so far) by the Ministry of Agriculture & Farmers' Welfare in favour of 151 water stressed (dark) blocks of 11 States, based on the recommendation of MoRD, for topping up the material component under MGNREGS beyond the permissible limit of 40% of the expenditure under material component.

There has been lot of technological advancement in use of space technology for mapping of natural resources, in respect of soil, water and vegetative covers, their quantity and quality, at regular intervals. National Remote Sensing Centre, ISRO, has Bhuvan web GIS portal alongwith mobile based applications for assessment of watersheds and monitoring of the activities undertaken.

**Central Ground Water Board (CGWB)** is a storehouse of information related to groundwater resource. CGWB has technical expertise available at regional/ State level on designs and structures suitable/ required for water stressed blocks based on their geomorphological and climatic zones.

With a view to leveraging the synergy of these programmes/ schemes and the vast data of relevant information, the Ministry of Rural Development in consultation and agreement with Ministry of Agriculture and Farmers' Welfare and Ministry of Water Resources has decided to bring out a convergence framework for planning, execution and monitoring of NRM works under these schemes.

The formulation of the labour Budget under Mahatma Gandhi NREGA for FY 17-18 is about to begin in the States. Preparation of District Irrigation Plan (DIPs) under PMKSY will be completed for all districts by the end of September, 2016. It is advised to ensure that the relevant portion of the Annual Action Plan/ LB for MGNREGS is duly incorporated in DIPs **and that at least 65% of expenditure under MGNREGS is on NRM works in FY 17-18 in the districts/ blocks listed in Annexures - 1, 2, 4 & 5.**

## **Protocols for Convergence among Mahatma Gandhi NREGA, PMKSY and IWMP**

### **1. Principles Governing NRM Planning**

There is a need for paradigm shift from Relief Works approach to Integrated Natural Resource Management (INRM) approach in implementation of MGNREGS. The works taken up in MGNREGS should change from taking up individual, stand-alone works in a typical 'relief works mode' to an INRM perspective. Planned and systematic development of land and harnessing of rainwater following watershed principles should become the central focus of MGNREGS works across the country to sustainably enhance farm productivity and incomes of poor people. The INRM shall include total quality management of natural resources with specific focus on in-situ rainwater harvesting to minimize rainwater run-off, bringing fallow lands into cultivation, putting common lands to productive use, developing the lands of SC/ST and small and marginal farmers(SMF) so as to enhance their productivity and strengthen livelihoods. Individual works can be logically sequenced and packaged together on the principles of INRM, to form projects. Even works on private lands should be taken up following the principles of watershed management in an integrated manner. Systematic identification and implementation of projects is highly recommended as it leads to creation of sustainable and productive assets for the community.

### **2. District as synergizing unit for convergent planning**

**2.1.** The district shall be the synergizing unit for convergent planning under the leadership of the District Collector. The Labour Budget (Annual Action Plan of Mahatma Gandhi NREGA) is to be coordinated by the District Programme Coordinator (DPC) i.e. Collector. The District Collector, as chairman of the District Planning Committee, has to approve the Perspective and Annual Action Plan relating to watershed projects (IWMP)

in the districts. As per para 13 of the Operational Guidelines of PMKSY, the District Level Implementation Committee (DLIC) is chaired by the Collector. The DLIC is expected to prepare the District Irrigation Plan (DIP) showing the contribution of various funding schemes and programmes towards specific outputs and outcomes. The DPC/ District Collector should ensure that the Annual Action Plans relating to MGNREGS, IWMP and PMKSY are coordinated in such a way that with the convergence of the ongoing schemes in the area, a comprehensive project of village/ watershed/ command area, incorporating/ integrating all the works/ activities required for the integrated development of the village/ watershed/ CAD approach is prepared. While developing the District Irrigation Plan, support of institutions like IITs, NIITs, Agriculture Universities, State technical institutions ought to be taken. Professionals could also be sourced as part of Corporate Social Responsibility. Universities could work in watersheds as a part of the 'Unnat Bharat Abhiyan'. For these partnerships at the district level, a clear thrust at the level of Chief Ministers of the States would be effective.

**2.2. The DPC/ Collector will ensure that the Natural Resource Management component of Labour Budget of Mahatma Gandhi NREGS is essentially made part of the District Irrigation Plan (DIP).**

**2.3.** Technical inputs, while planning, will be drawn from the joint pool of technical personnel of IWMP in Watershed Cell cum Data Centre, Mahatma Gandhi NREGA unit and the Agriculture department.

**3. Consultation with regional offices of Central Ground Water Board**

**3.1. Regional resources of Central Ground Water Board** can be utilized to make informed decisions with the aquifer maps made available by them for finalizing the location of the proposed water bodies. They can also provide details on design of structures required for groundwater recharge specific to regions, under planning consideration. The Regional Directors should be requested to present the scope of services they can offer in preparation of a scientific plan for NRM works.

**4. Consultation with National Remote Sensing Centre (NRSC), ISRO**

**4.1.** The geoportal of NRSC, Bhuvan has complete solution for planning for Natural Resource Management. It has high resolution satellite data and information relating to rainwater, surface water, groundwater and soil moisture; water run offs, land contours, drainage, soil conditions to analyse and give near accurate location of required water conservation/ harvesting structures. The State Remote Sensing Centres should also be requested to extend full support to State Rural Development Departments for planning purposes.

**4.2.** The mobile apps of NRSC will be customised to plan for NRM related Mahatma Gandhi NREGA works which will be geotagged and tracked from planning to execution, as part of a watershed/ DIP.

**5. Community based participatory planning and creation of sustainable livelihoods**

Creation of sustainable livelihoods is one of the desired outputs of NRM/ IWMP works; hence, the Self Help Groups (SHGs) under NRLM will be closely involved in the planning and implementation of watershed projects under Mahatma Gandhi NREGS.

## 6. Process of Ratification by the Gram Panchayat(s) for shelf of projects

Under MGNREGS, the Gram Panchayats deliberate and finalize prioritization of shelf of projects. Macro and Micro watersheds of 2500- 5000 hectares will often comprise 1-10 Gram Panchayats, depending on the size of GPs in the States. To facilitate an evidence based scientific planning process the recommended work plan on Watersheds as approved in the District Irrigation Plan will be sent to all the concerned Gram Panchayats for community validation and vetting. The final DPR, reflecting all community suggestions will then be recommended by all Gram Sabhas of all Gram Panchayats involved in the Watershed. The process of creating a community organization at the watershed level will also commence simultaneously so that a community led planning and implementation structure is in place well before financial resources are committed for the project.

MGNREGS will have to evolve systems of planning and implementing across more than one Gram Panchayat as this is ordinarily not the practice. Cluster Facilitation Teams of the MGNREGS in Water stressed regions and Intensive Block clusters of NRLM should be actively involved in this process.

## 7. Mahatma Gandhi NREGA with or without convergence with IWMP

With a view to systematically implement watershed management works under Mahatma Gandhi NREGA **with or without convergence with IWMP** a structured approach should be adopted as under:-

### 7.1. Watershed management works taken up independently under Mahatma Gandhi NREGA-

Watershed management works can be taken up independently under MGNREGA **where there is no IWMP project sanctioned**. These works will be subject to the following conditions:

- 7.1.1. Watershed Management works will be taken up only after a comprehensive assessment of the entire watershed in the GP and shall address all issues of soil erosion, rain water retention and afforestation. **Stand-alone works in the above category without a comprehensive water shed plan shall not be permitted.** Efforts to complete structures in one working season will be made rather than carrying on works for many years. Out comes must be time bound for the approach to be successful.
- 7.1.2. The comprehensive watershed plan shall be prepared in accordance with the concepts of ridge to valley treatment. It is recommended to use the satellite imagery for this planning work.
- 7.1.3. For selection of the appropriate sites and preparing the above plans, the Engineers/Technical Assistants and Mates of MGNREGS at Block and GP level would be trained and supported by the State Level Nodal Agency (SLNA) of IWMP and technical personnels of WCDC, the cost of which would be met by the Administrative cost of MGNREGS.
- 7.1.4. Watershed works will preferably be taken up in cluster approach.

### 7.2. Watershed management works under MGNREGA in convergence with IWMP-

wherever IWMP project is already sanctioned, it must be ensured that the material intensive works are taken up under IWMP, and all the other labour intensive NRM works shall be done under MGNREGS. Under no circumstance shall there be duplication or double counting of works. It shall be the responsibility of the Programme

Officers of MGNREGS and IWMP to ensure this convergence and follow all non-negotiables and processes of MGNREGA.

- 7.3. **Areas where IWMP is already under implementation-** In these places the Detailed Project Reports (DPRs) prepared under IWMP may contain NRM works for which there is inadequate fund provision under IWMP. These NRM category works can be included in the shelf of projects under MGNREGA to be funded by it and executed as per its processes. The Watershed Development Team (WDT) will prepare the technical estimates, provide technical support to the Technical Assistants/JEs of MGNREGA and do the final check measurement cum evaluation of outcomes. It is advisable to straightway take up watersheds in which 1 and half years of IWMP preparatory work has been completed
- 7.4. Areas where DPR needs to be revisited due to inadequacy the eDPRs of these watersheds should be used.
- 7.5. **New IWMP projects-**In all future IWMP projects where DPRs of IWMP will be prepared, the NRM activities to be taken up through convergence with MGNREGA need to be included and clearly indicated in the DPR in consultation with concerned officials of MGNREGS, watershed committees and Gram Sabha. The technical resources of Watershed areas should be moved in these areas to prepare the DPRs. CSRs can be encouraged to provide technical resources for these areas so that good DPRs may be prepared and effective monitoring is done.

## **8. Priortizing CAD&WM**

Surface irrigation systems have made a major contribution towards promoting food security and reduction of poverty in India. However, a major challenge facing surface irrigation systems is the growing gap between irrigation capacity created and irrigation capacity utilised. The major reason for this growing gap is the neglect of command area development, especially field channels.

The works permissible under MGNREGA will entail one-time rehabilitation of minors, sub-minors and field channels, including desilting, repair of minor cracks, earth leveling, repair of earthen embankments, bank raising and resurfacing canal base with clay. Regular O&M will not be a permissible activity under MGNREGA. To facilitate identification of CAD&WM works following list is attached:-

- i) List of outstanding CAD works (Annexure-4)
- ii) List of non functional Water Bodies (Annexure -5)

## **9. Construction of Wells**

A major activity that has been widely undertaken under MGNREGA is the construction of wells. However, it has been observed that on many occasions, this has been done in an indiscriminate manner without reference to the prevailing hydro-geological conditions and the possible impact on the already receding, water table and water quality. Groundwater is a common pool resource. Extraction of groundwater through individual sources such as wells and tubewells can sometimes threaten the quantity (depth) and quality of the resource. The following conditions are, therefore, being prescribed for undertaking digging of wells under MGNREGA:

## 112 Most “irrigation-deprived” districts in India

State	District(s)
Andhra Pradesh (4)	Adilabad, Anantpur, Mehbubnagar, Rangareddi
Assam (19)	Barpeta, Bongaigaon, Darrang, Dhemaji, Dhubri, Dibrugarh, Goalpara, Golaghat, Hailakandi, Jorhat, Kamrup, Karimganj, Kokrajhar, Lakhimpur, Marigaon, Nagaon, Sibsagar, Sonitpur, Tinsukia
Bihar (7)	Begusarai, Darbhanga, Jamui, Khagaria, Madhepura, Purnia, Samastipur
Chhattisgarh (11)	Bastar, Dantewada, Jashpur, Kanker, Kawardha, Korba, Koriya, Mahasamund, Raigarh, Rajnandgaon, Surguja
Gujarat (6)	Amreli, Dahod, Panchmahal, Surendranagar, The Dangs, Valsad
Jharkhand (16)	Bokaro, Chatra, Deogarh, Dhanbad, Dumka, Garhwa, Giridih, Godda, Gumla, Hazaribagh, Pakaur, Palamu, PashchimiSingbhum, PurbiSinghbhum, Ranchi, Sahibganj
Karnataka (6)	Bidar, Chikmagalur, Dharwad, Gulbarga, Hassan, Haveri
Madhya Pradesh (5)	Dindori, Mandla, Panna, Shahdol, Umaria
Maharashtra (23)	Akola, Amravati, Aurangabad, Bid, Buldana, Chandrapur, Dhule, Hingoli, Jalna, Latur, Nagpur, Nanded, Nandurbar, Osmanabad, Parbhani, Pune, Raigarh, Ratnagiri, Sindhudurg, Thane, Wardha, Washim, Yavatmal
Orissa (12)	Balangir, Dhenkanal, Jharsuguda, Kandhamal, Kendujhar, Khordha, Malkangiri, Mayurbhanj, Nabarangapur, Nayagarh, Naupada, Sundargarh
Uttar Pradesh (2)	Chitrakoot, Sonbhadra
West Bengal (1)	Puruliya
TOTAL = 112	

- a. Bore wells and tube wells will NOT be considered as a permissible activity under MGNREGA, under any circumstances.
- b. Digging of private wells will not be a permissible activity under MGNREGA in areas which have been classified as semi-critical or critical or over exploited according to Central Ground Water Boards' (CGWB) latest assessment.
- c. In areas which have been classified as semi-critical or critical or over exploited according to CGWB's latest assessment, only "group wells" will be allowed where a group of farmers agrees to share the water from such a "group well". Each such group will comprise at least 3 farmers.
- d. There should be a formal agreement (on Stamp Paper) between farmers for water sharing from a group well. Verification of the agreement within this group will be through the GP.
- e. Only one member from one family can be the member of the group. He/she cannot be members of more than one group.
- f. A Group Well should be registered as a Group Irrigation Well in revenue records.
- g. In areas classified as "safe" by the CGWB, individual wells may be considered. Depth and diameter of such wells and well to well spacing must conform to the hydrogeology of the area. In hard rock areas, diameters must be kept within 8m. For softer rock and alluvial areas, well diameter must be less than 6m.

#### **10. Monitoring**

The quality of execution of the Natural Resource Management works under MGNREGS will be reviewed at the level of Principal Secretary/ Secretary, Rural Development Department/ Commissioners (MGNREGA), at regular intervals.

## List of Over Exploited Blocks (2011)

S.No	State	District	Tehsil	Block
1	Andhra Pradesh	ANANTAPUR	AGALI	AGALI
2	Andhra Pradesh	ANANTAPUR	AMADAGUR	AMADAGUR

**COMMAND AREA DEVELOPMENT (CAD) WORKS FOR THE ONGOING  
SCHEMES OTHER THAN 99 PRIORITIZED AIBP PROJECTS**

**- For Convergence with Mahatma Gandhi NREGA -**

**Command Area Development & Water Management (CADWM) Program**

Command Area Development (CAD) works through CADWM Programme are being implemented since 1974-75. The program has been brought under Pradhan Mantri Krishi Sinchai Yojna (PMKSY) - Har Khet Ko Pani from 2015-16 onwards. CAD works of 99 prioritized AIBP projects are being implemented from 2016-17 onwards for implementation of CAD pari-passu with AIBP implementation.

**About CAD Works**

The main objective of taking up CAD works is to enhance utilisation of irrigation potential created and improve agriculture productivity and production on a sustainable basis through integrated and coordinated approach involving multidisciplinary team.

The core component of the programme is construction of field channels from the outlet to each and every field of the irrigation command. To promote water use efficiency in irrigation, at least 10% of the culturable command area (CCA) of each project under the Programme during XII Plan is to be covered with micro irrigation in lieu of field channels for development of infrastructure to facilitate installation of sprinkler/drip irrigation systems. The cost for on-farm micro irrigation (sprinkler/drip) systems is to be borne by the farmers with support from the extant programme in Ministry of Agriculture and Farmers Welfare.

Payment of central assistance to State is linked with the formation of Water Users' Associations. The participation of farmers in the management of irrigation would include transfer of responsibility for operation & maintenance of irrigation systems with focus on water conservation and efficient water use. To facilitate the working of Water Users' Associations (WUAs), one time functional grant @ Rs.1200/- per ha, to be shared by the Centre, State and farmers, is being provided. In addition, one time infrastructure grant is also being provided to the registered WUAs during XII Plan.

**Status of CAD Works**

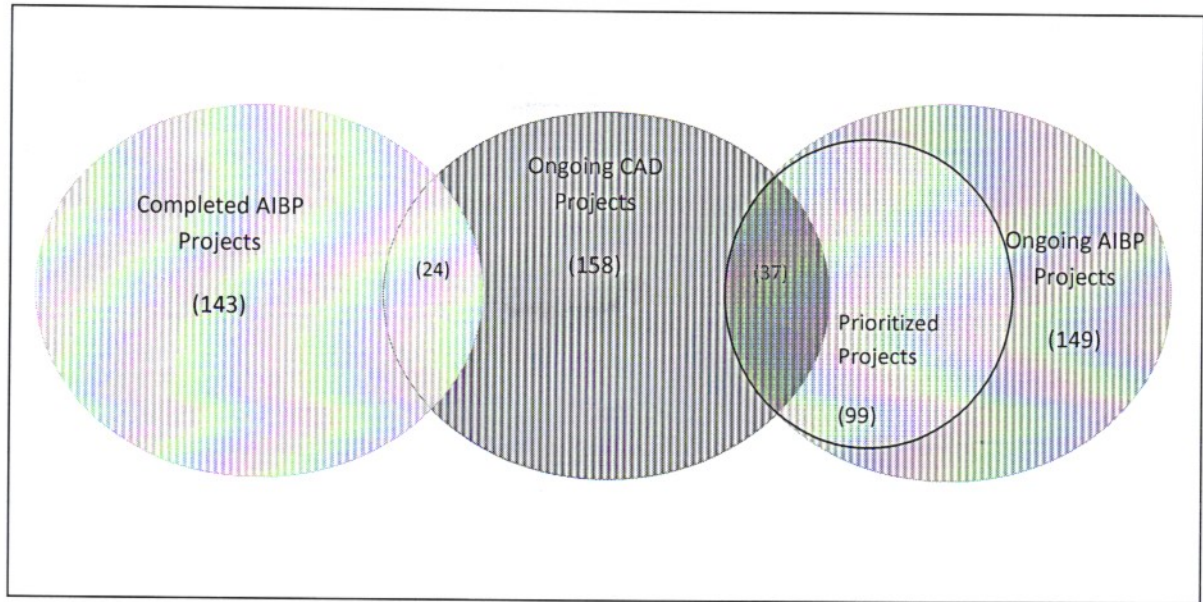

The CAD works, with focus on on-farm development below the level of minors, have been initially taken up by the Ministry of Water Resources as a separate scheme independent of the AIBP scheme which was focussed on water conveyance up to distributaries and minors.

So far CAD works on 219 projects have been completed achieving Culturable Command Area (CCA) of 15.0 million hectares (Mha). On the other hand 143 AIBP projects have been completed of which 35 projects (CCA: 1.27 Mha) have been completed from CAD angle as well, and in 24 projects (CCA: 2.37 Mha) the CAD works on still going on.

There are a total of 158 ongoing CAD projects targeting CCA of 9.58 Mha. There have been 149 ongoing AIBP projects, of which 37 (CCA: 3.039 Mha) are common with the

ongoing CAD projects. However with the identification of prioritized AIBP projects, the number of AIBP projects has been restricted to 99 and all the 37 common projects of CAD are also common with the prioritized projects.

The earlier 149 ongoing AIBP projects also included 16 ERM projects, and in 9 such projects (CCA: 1.07 Mha) the CAD works were also taken up and works have been completed in 1 ERM project (CCA: 0.005 Mha).

#### **Balance (ongoing) CAD Works and the Estimated Cost**

Excluding the CAD works of the 99 prioritized AIBP projects, the CAD works are in an ongoing mode in 121 projects. The balance extent of CCA to be covered in these ongoing projects is 6.54 Mha. Assuming a cost of Rs. 40,000 per hectare (as considered in case of prioritized projects) the total cost of balance (ongoing) CAD works is estimated to be Rs. 17705 crore (Rs.11202 crore + Rs.6503 crore) as summarized below:

(CCA in Million hectares; Amount in Rs. Crore)

Sl. No.	Particulars of ongoing CAD works	No. of projects	CCA Targeted	CCA Covered	CCA Balance	Estimated Cost
1	AIBP completed projects	24 <sup>a</sup>	2.37	0.75	1.62	6503
2	Other than AIBP projects	97 <sup>b</sup>	4.17	1.37	2.80	11202
3	ERM projects	9 <sup>c</sup>	1.07	0.0	1.07	4299
Total		130	7.61	2.12	5.49	22004

a. State-wise summary along with list of projects given as Annexure-I

b. State-wise summary along with list of projects given as Annexure-II

c. State-wise summary along with list of projects given as Annexure-III

#### **Funding of Balance CAD Works**

As brought out above, funding of balance 130 ongoing CAD projects (other than prioritized AIBP projects) at an estimated cost of Rs.22004 crore may be considered for funding through MORD.
